Horses Deserve the Best

“One of my race horses pulled a muscle in his shoulder just days before he was to run, too close to the race to treat him with medication, we had Madison use MagnaWave on him. The very next day he was sound and even feeling better than before the injury! Seriously works!”

- Sarah O'Brien

WHAT IS MAGNAWAVE FOR EQUINE

MagnaWave is used in nearly every competitive equestrian discipline for equine performance enhancement, health maintenance, and healing.

Working on a cellular level, MagnaWave encourages the body to heal itself. Owners and trainers can generally see and feel an improvement in the way the horse moves after several MagnaWave sessions. MagnaWave for horses is a safe and effective, drug free alternative to keep your horse in optimal health.

MAGNAWAVE FOR HORSES HELPS:
